

SmartSafe S-Class

For Smart Cash Handling

- ▶ Reduce the cost of cash handling
- ▶ Simplify the work
- ▶ Increase security

The SmartSafe S-Class is a flexible series with several solutions. We will assess your needs and recommend the best solution to meet your requirements.

The Benefits of SmartSafe

The SCAN COIN S-Class series represent the perfect solution for both back office and front office environments. The SmartSafe will cut the costs of cash handling through both internal optimisation as well as CIT pick-ups and deliveries. It is a secure, smart and high performing note deposit unit.

No manual counting

The notes are counted and compiled automatically.

Tailored reporting solution

Complete reports of deposits and total sum of each denomination are generated in real-time. Information on the time of deposit and who deposited is also always available.

Web based cash management

The machine automatically generates a report to your bank or CIT company at the end of the day.

High security keeps the money safe and reduce your insurance cost

A SmartSafe increases the security of your employees. The solution is classified and accepted by the insurance companies.*

*Applies with the customer's insurance.

User-friendly

Anyone can learn how to deposit and receive reports in just a few minutes.

Easy to install and clean

The SmartSafe requires only electricity and internet access. SCAN COIN handles the installation and ensures your staff are properly trained.

Less visits by the CIT company reduces your costs dramatically

Through an online connection, the CIT company receives information when your machine is full and needs to be emptied. Today all CIT companies handle SmartSafes and they are experienced in operating the equipment.

Requires little space

Since the machine packs the bills, it can handle large volumes in a small area. It has a small footprint and can be placed even in the smallest environments.

Low price

With a low price you can earn a return on your investment in a short amount of time.

24/7

Makes cash handling an easy process every day - all year round.

Thanks to its competitiveness and strong capacity, the SmartSafe S-Class is the perfect solution for smaller retailers to larger grocery store, hotels, gambling halls, amusement parks, gas stations, chemist's shops, cinemas and public transport companies.

Compatible with SCAN COIN's cloud based monitoring system, SoftOne Intelligence.

Scalable Solutions after your Needs

The SmartSafe S-class range consists of five solutions and can be connected to several coin units. This flexible solution assures you to always find the most suitable one for your business. Its high reliability and security with cutting-edge technology, in combination with its innovative functions, makes it a perfect partner for cash handling. Furthermore, the SmartSafe S-Class is connected to the smart software platform, SoftOne Intelligence, which includes all the functionalities needed in the Retail world. You will get profile management, data management and automatic reports, whenever you need it.

Maximize the output

- Connect your SmartSafe S-Class to a SCAN COIN coin unit

For complete cash automation, the SmartSafe can be connected to a coin unit. Handling cash manually is a time consuming task, especially when it comes to coins. Therefore, we highly recommend you to install the complete cash solution. In this way you maximize the output of your solution and benefit from a complete system including all aspects of your cash handling. It only takes seconds to make a deposit and to get your till ready.

By installing a complete Retail Cash Solution, you will dramatically decrease the time spent on cash handling. At the same time, you improve security for your employees and let them focus on more valuable tasks such as customer service and support.

SCAN COIN can offer you several coin solutions, such as back office solutions for cash deposit or cash recycling, as well as front office solutions. We will help you choose the combination of units that best meets your needs, always connected to the unique software platform. Thanks to its software integration, you will get a complete overview of the cash flow and reports will be sent to your financial department.
